

Summary of Childcare Costs (Mean, Std, Min, Max)

# Distribution of Childcare Costs

# Histogram of Infant Childcare Costs

## Childcare Data Analysis Summary

### Dataset:

The dataset comes from the National Database of Childcare Prices. It contains over 200 variables related to economic, demographic, and childcare pricing data across U.S. counties and states.

### Key Findings:

1. Childcare costs vary widely across regions and types of care.
2. Infant care (MCInfant) is generally the most expensive, followed by Toddler and Preschool care.
3. The dataset contains detailed breakdowns of employment and household statistics which can be used to model or explain price differences.
4. There are no missing values in the sampled portion of the dataset, indicating high data quality.

### Recommended Next Steps:

- Perform a deeper state- or county-level breakdown
- Explore correlations between income, employment, and childcare costs
- Prepare predictive models or dashboards using this dataset

This summary is based on an initial sample of 500 rows for quick analysis.
